screening: screen all students and staff for potential COVID-19 symptoms or exposure

**start here**
If screening in person, wear proper PPE*.

**exposure:** within the last 14 days, have you been in contact with a person who is diagnosed with COVID-19?
- yes
- no

- yes for any symptom
  - seek virtual or in-person evaluation by a health care provider

**symptoms:** within the last 48 hours, have you had any of the following signs and symptoms of illness?
- new cough (or change in baseline)
- fever (≥100.4°F)
- new onset severe headache
- sore throat
- vomiting/diarrhea
- abdominal pain
- loss of taste/smell

- yes for any symptom
  - seek virtual or in-person evaluation by a health care provider

Based on outcome of assessment and/or tests:
- diagnosis of COVID-19 (notify school district and health department of positive)
  - isolate at home
  - return to school after:
    - 24 hours afebrile, without fever reducing medicines
    - AND 10 days since first symptoms
    - AND symptoms improving

- alternative diagnosis
  - isolate at home
  - return to school after:
    - 24 hours afebrile, without fever reducing medicines
    - AND symptoms improving
    - Return may depend on your diagnosis

- no diagnosis of COVID-19
  - no symptoms
  - return to class

**quarantine at home**
return to school after
14 days from last contact unless symptoms develop
If symptoms develop, isolate at home and seek evaluation by a health care provider

* Proper PPE includes: health care grade surgical mask/N95 and eye protection

Isolate and quarantine are used throughout this document.
For clarification, the definitions are:
- Isolate: Separate a sick or contagious person from others who are not sick.
- Quarantine: Separate or restrict movement of people who were exposed to a contagious illness to see if they become sick.
