“Hi, we’re screening everyone before they come inside. We need to take your temperature and ask you a few questions.”

Where are they going today?

- If they are going to pharmacy, call a runner to get information from them, then they can go back to their car for curbside pick-up
  - Main x8770
  - South x5644

Take temperature, ask cough/shortness of breath questions.

- If child and caregiver screen **NO** to all:
  - **Green wristband**
  - Hand sanitizer
  - If at main campus, send to welcome center for further instructions; otherwise direct them to their destination
- If child and caregiver has **ANY** of the following:
  - A fever higher than 100.4 degrees
  - Cough
  - Shortness of breath
- Ask where they are going.
  - If they are going to an essential appointment (for example: ED/UC, sick kid appointment, respiratory clinic appointment, hem/onc appointment, pulmonary clinic, post-op appointment or diagnostic test/lab/imaging), they may proceed with:
    - Mask
    - **Yellow wristband**
    - Hand sanitizer
    - If at main campus, send to welcome center for further instructions; otherwise direct them to their destination.
  - If not certain if it is an essential appointment, call the welcome desk at x5380
    - Ask that welcome center staff get in touch with the clinic to determine if visit is essential.
    - If clinic determines visit is not essential, patient family will be directed home to reschedule their appointment.
    - Phone number to reschedule is 937-641-4000, unless the clinic specifies otherwise.
Any special circumstances or visit need in question - call the command center at x4482

*Clinics should be calling the day before visits to make sure the family is well enough for the visit.

** South campus - Cornerstone and PriMed patients, families and employees do not have to be screened by Dayton Children’s personnel. They will be screened in their respective areas.
